Photo Feature #4

Photo Feature #5

The **Mach 3** is a versatile, cost efficient coin sorter, counter, and packager all in one! With multiple functionalities, the **Mach 3** has a processing speed of up to 1500 coins per minute with sorting capabilities up to 6 denominations. The **Mach 3** coin sorter provides reliable alternatives to counting, sorting and wrapping your coin by hand.

Versatile, Fast, and Reliable

The **Mach 3** is a versatile compact coin sorter, counter and packager with optional exact bag stops and coin tubing options. The **Mach 3** is fast, accurate, reliable, serviceable and simplifies coin processing for any business that currently counts, sorts and wraps coins by hand or uses a coin packager.

The **Mach 3** features one of the highest coin sorting speeds at up to 1500 coins per minute of any coin/sorter counter in its class. Its compact size utilizes minimal tabletop or counter space and fits easily into any cash room environment. The **Mach 3** has a built-in carrying handle with an optional cover/carry bag. The optional soft-sided cover/carry bag not only protects the unit but also keeps the standard coin drawers securely in position during transport. The **Mach 3** can be linked to various applications as well.

Ease of Use

Selectable bag stops, batch and grand totals are easily accessed via a direct keypad. A two-line alphanumeric display conveys operational messages at a glance.

A lockout security function can place operating functions in the hands of supervisory personnel only. The **Mach 3** is easy to use and maintain.

Multiple Functionality and Options

In addition to sorting coin into drawers and bags, (Photo Feature #4) the **Mach 3** with exact bag stops can be equipped with a coin tubing feature. This feature allows the customer or end-user two different options:

1. The capability to sort the coin first and then follow-up by tubing individual denominations, OR
2. The capability to sort and tube the coin in one step. Photo Features #1 and #2.

The customer will not have to stand at the **Mach 3** and hold the paper coin wrap. The tubing attachments have been designed with a base that allows the first coin to fall flat into the paper tube and is supported.

Another option feature of the **Mach 3** is the cash till sorting kit (Photo Feature #5) consisting of a funnel and manifold. This feature is the ultimate in convenience for retailers who must count their cash register drawers frequently, and have the coins properly sorted back into the appropriate locations at the same time.

The **Mach 3** is one of the most fully featured coin sorters available on the market today offering a low overall cost of ownership. Photo Feature #3.

De La Rue Cash Systems' sorters/counters are the direct result of over 100 years' experience in design, manufacture and distribution of world class coin processing machines. Worldwide factory-trained service and support specialists are provided through De La Rue Cash Systems' network of branch offices and authorized distributors

Technical Specification

Dimensions
